

UPDATE ON BOSTON WATER QUALITY

Consumers may become aware of recent news concerning a database and an assessment of the U.S. drinking water supply produced by an independent environmental group. Boston Water and Sewer Commission purchases its water from the Massachusetts Water Resources Authority who takes hundreds of thousands of tests each year to ensure our water is safe and of the highest quality. Our water exceeds both federal and state water quality standards, and residents and visitors should have every confidence in the water they consume every day.

For more information on how MWRA maintains high water quality, and for MWRA's statement on the recent report, please go to their web site: <http://www.mwra.state.ma.us/index.html>
