

The Private Lead Replacement Incentive Program

What Is the Cost?

The estimated cost of the private lead water service replacement will be determined after an initial review of the property. Eligible property owners will be credited up to \$4,000 towards the cost of the replacement by enrolling in this voluntary program.

How Can I Pay?

Property owners will have the ability to pay for the amount exceeding \$4,000 (if applicable) for lead service replacement either:

- ▶ In a lump sum payment
- ▶ Interest-free, over a 60-month period as part of the water and sewer bill

How to Apply

To apply, call the Lead Hotline at 617-989-7888. Your property will be reviewed. Once the cost is determined, you may enroll, if eligible. The replacement work is generally performed weekdays and is subject to availability.

Additional Information

For more information, call the Lead Hotline at 617-989-7888.

Let's Protect Boston's Waterways

Lead and Your Health

Excessive amounts of lead in the body can present health risks. The greatest risks are to young children and pregnant women. Exceedance of regulated values can slow down mental and physical development in children.

Why Replace a Lead Service?

Lead generally is not present in source water but can enter the tap water through corrosion of plumbing materials. Prior to 1950, lead was used for exterior plumbing connections and can be found in older buildings. If the water service line at your property is made of lead, you are encouraged to participate in this program to replace it and protect the health of occupants in the building.

What Can I Do to Reduce the Risk?

- ▶ **Replace your private lead water service.**
- ▶ Put a bottle of water in the refrigerator at night for early morning use.
- ▶ Use only cold water for drinking and cooking. Before drinking, flush the water system by running the tap until the water is cold to the touch, especially if you have not used the water for a few hours. The longer water remains standing in a lead pipe, the greater the chance lead can leach into the water.

What Is a Private Water Service?

It is the portion of the water service pipe running from the property line into the building. This pipe may be made of lead. The removal of any portion of a lead service in the public way is fully funded by the Commission. Removal of all lead services is the ultimate goal.

The Program

The Lead Replacement Incentive Program exists to encourage Boston's property owners to replace private lead water services. While private water service connections are the responsibility of the owner, Boston Water and Sewer Commission (BWSC) has developed this voluntary grant program as an incentive to remove lead from water services. Financial assistance in the form of a credit up to \$4,000 towards the cost of the replacement and the ability to pay interest-free over a 60-month period is available to eligible property owners.

Who Is Eligible?

Boston property owners are eligible to participate in the Lead Replacement Incentive Program if all of the following conditions are met:

- ▶ The property is served by a two-inch or smaller water service pipe, which contains lead.
- ▶ The water and sewer account for the property is active and not delinquent.
- ▶ The property owner agrees to have the work done by BWSC.

BWSC reserves the right to determine eligibility of a property.
