

**Boston Water and  
Sewer Commission**

# Upper Roxbury Sewer Separation Phase 3 Project Update

## **BWSC Contract: 17-309-011**

### Typical Sewer Separation Project

#### **PURPOSE**

Phase 3 of the project is a continuation of the work recently completed on Dudley Street and involves the installation of new storm drains to separate the stormwater flow from the existing combined sewers.

#### **UPCOMING WORK**

Construction is anticipated to start in July of 2022 and will last approximately two years.

This is a large complex project which consists primarily of sewer separation. Installation of new sewer and drainpipes will require deep excavations, large equipment and impacts to traffic, parking, local businesses, and residents. This project also includes some water main replacement work.

#### **ANTICIPATED IMPACTS**

The anticipated impacts include water service interruptions, noise, traffic and parking modifications, rodent activity, dust, and general construction impacts. The contractor will be required to minimize impacts to the extent feasible.

Detours to outbound traffic on Blue Hill Avenue will be required to facilitate the work.

#### **SURFACE RESTORATION**

Temporary restoration of roadways, sidewalks and other areas disturbed by construction will be completed under this contract. Permanent paving restoration will occur under a separate contract.
