Boston Water and Sewer Commission At Work

BWSC and its contractors are constantly working to improve the overall efficiency and reliability of Boston's water, sewer and drainage systems. Thus far in 2024, 35,000 feet of water, sewer and drainpipes were replaced, and 24,000 feet of sewer and drains have been rehabilitated city wide. In addition, this work includes the replacement and repairing of catch basins to help minimize flooding. There is 22,000 feet of water main replacement currently underway that will be completed this fall as cold weather approaches. Sewer and drain improvements will continue during the construction moratorium (November through April) weather permitting. Residents and businesses in East Boston, South Boston and Dorchester can expect to see sewer separation projects happening in their neighborhoods during the winter moratorium. For more information about BWSC's construction projects or what's happening in your neighborhood, refer to bwsc.org/projects/project-lookup.

Environmentally Friendly Payment Option

Sign up for convenient, contact free E-Bill

Step 1: Register for the Customer Self-Service portal

You will need online access, a valid e-mail address, your account number and an activation code to enroll. Your activation code can be found on your bill.

Step 2: Sign up for E-Bill

Visit www.bwsc.org and click "my account" in the top right corner. Once you're in the Customer Self-Service portal, the E-Bill icon can be found on your account's "my information" page. You will then receive a paperless bill every month.

Receive your bill by text or email

In addition to signing up for E-Bill, the BWSC Customer Self-Service portal offers the option to view past bills online and even receive your bill through text message.

Access to past bills in the portal
